

Technologies for our future

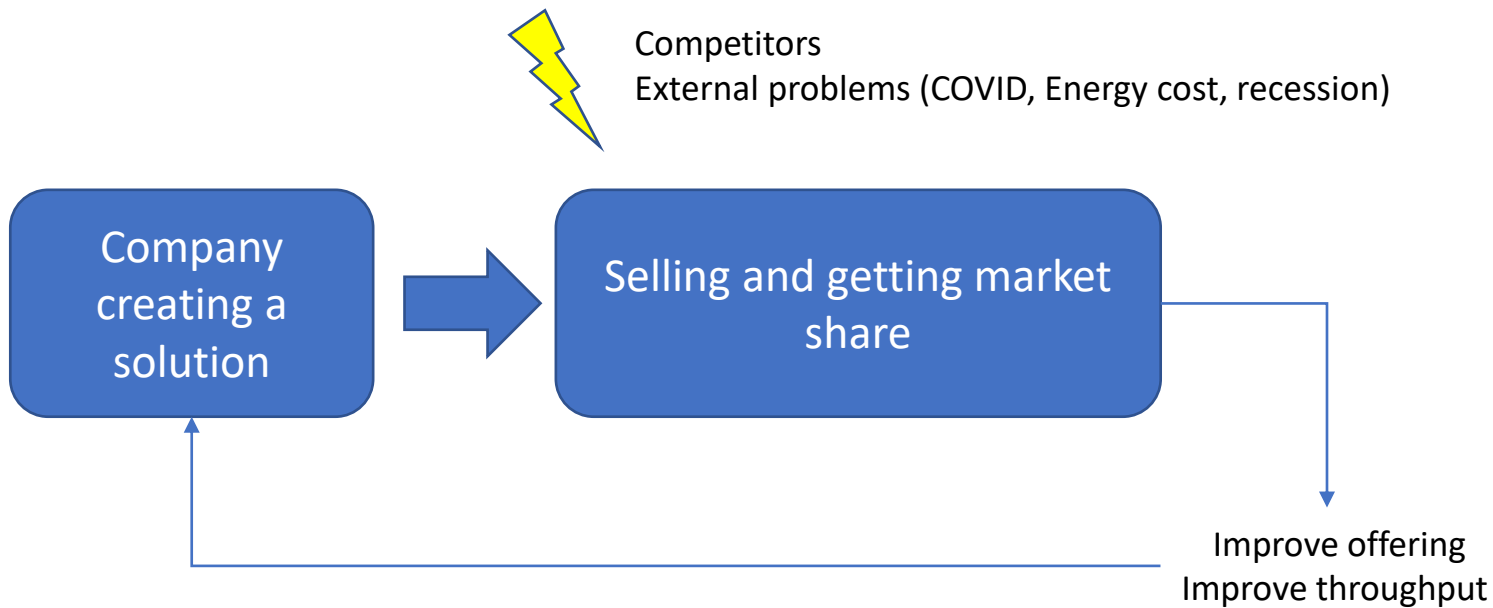

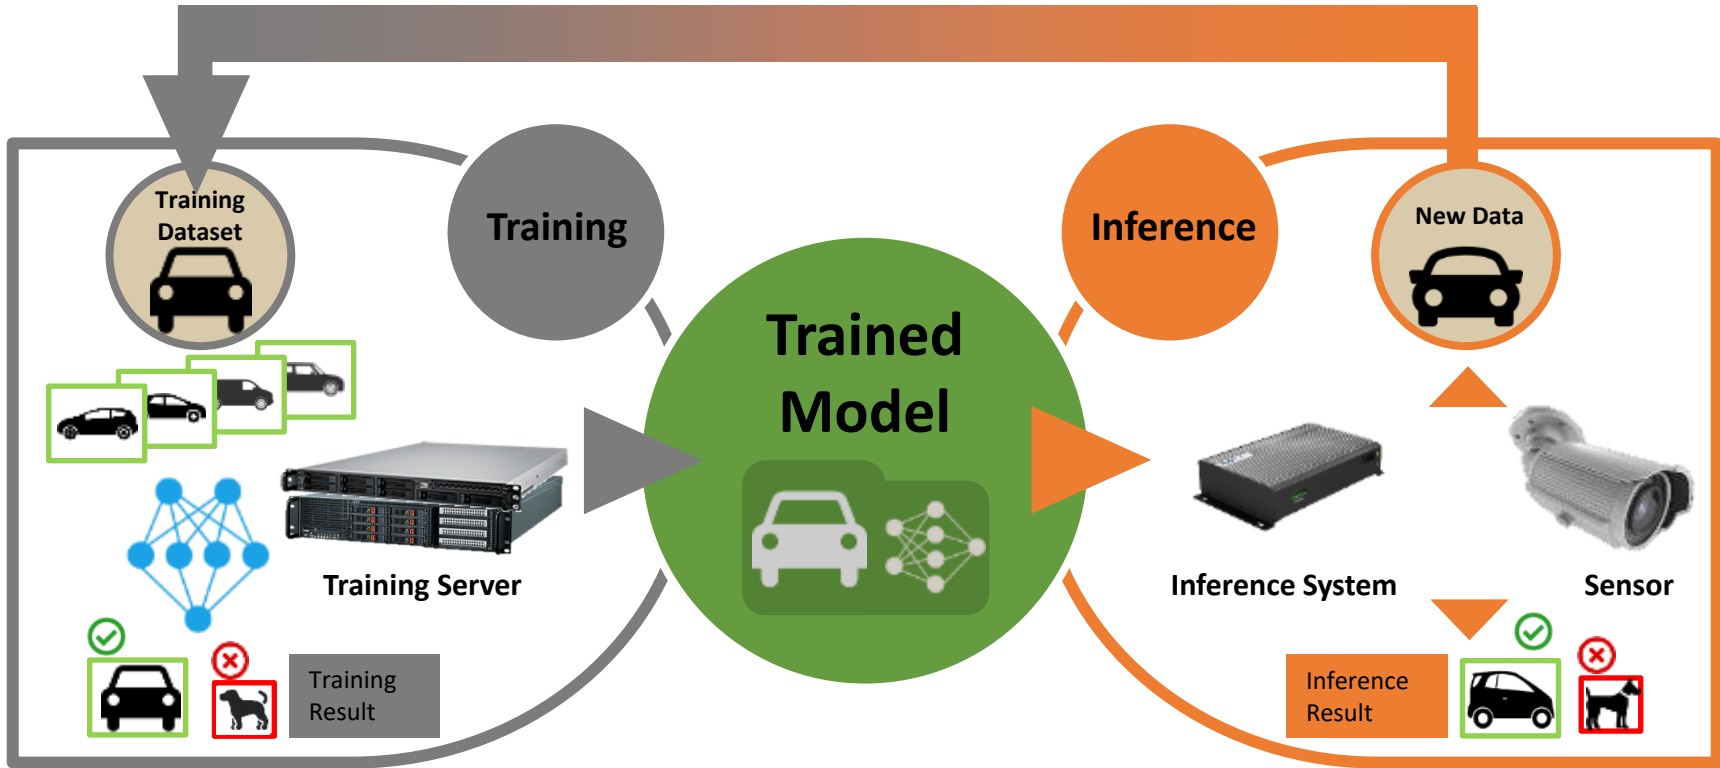

I 3 pilastri tecnologici della futura automazione : AI, Wireless e Cloud

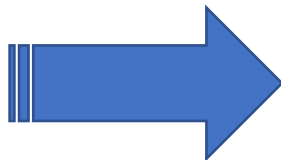

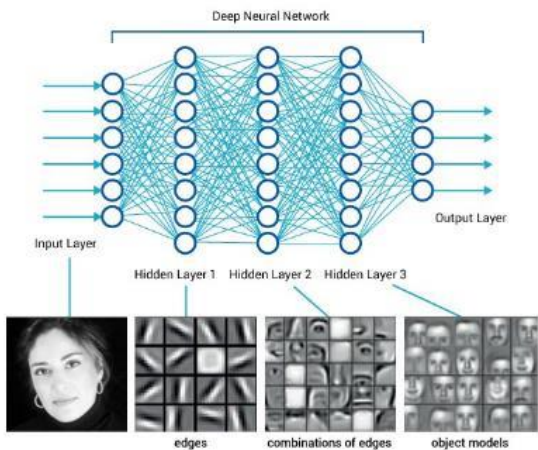

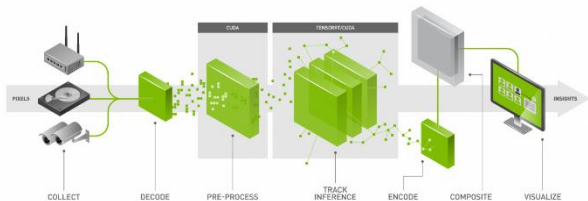

Stefano Ricotta

ADVANTECH

Enabling an Intelligent Planet

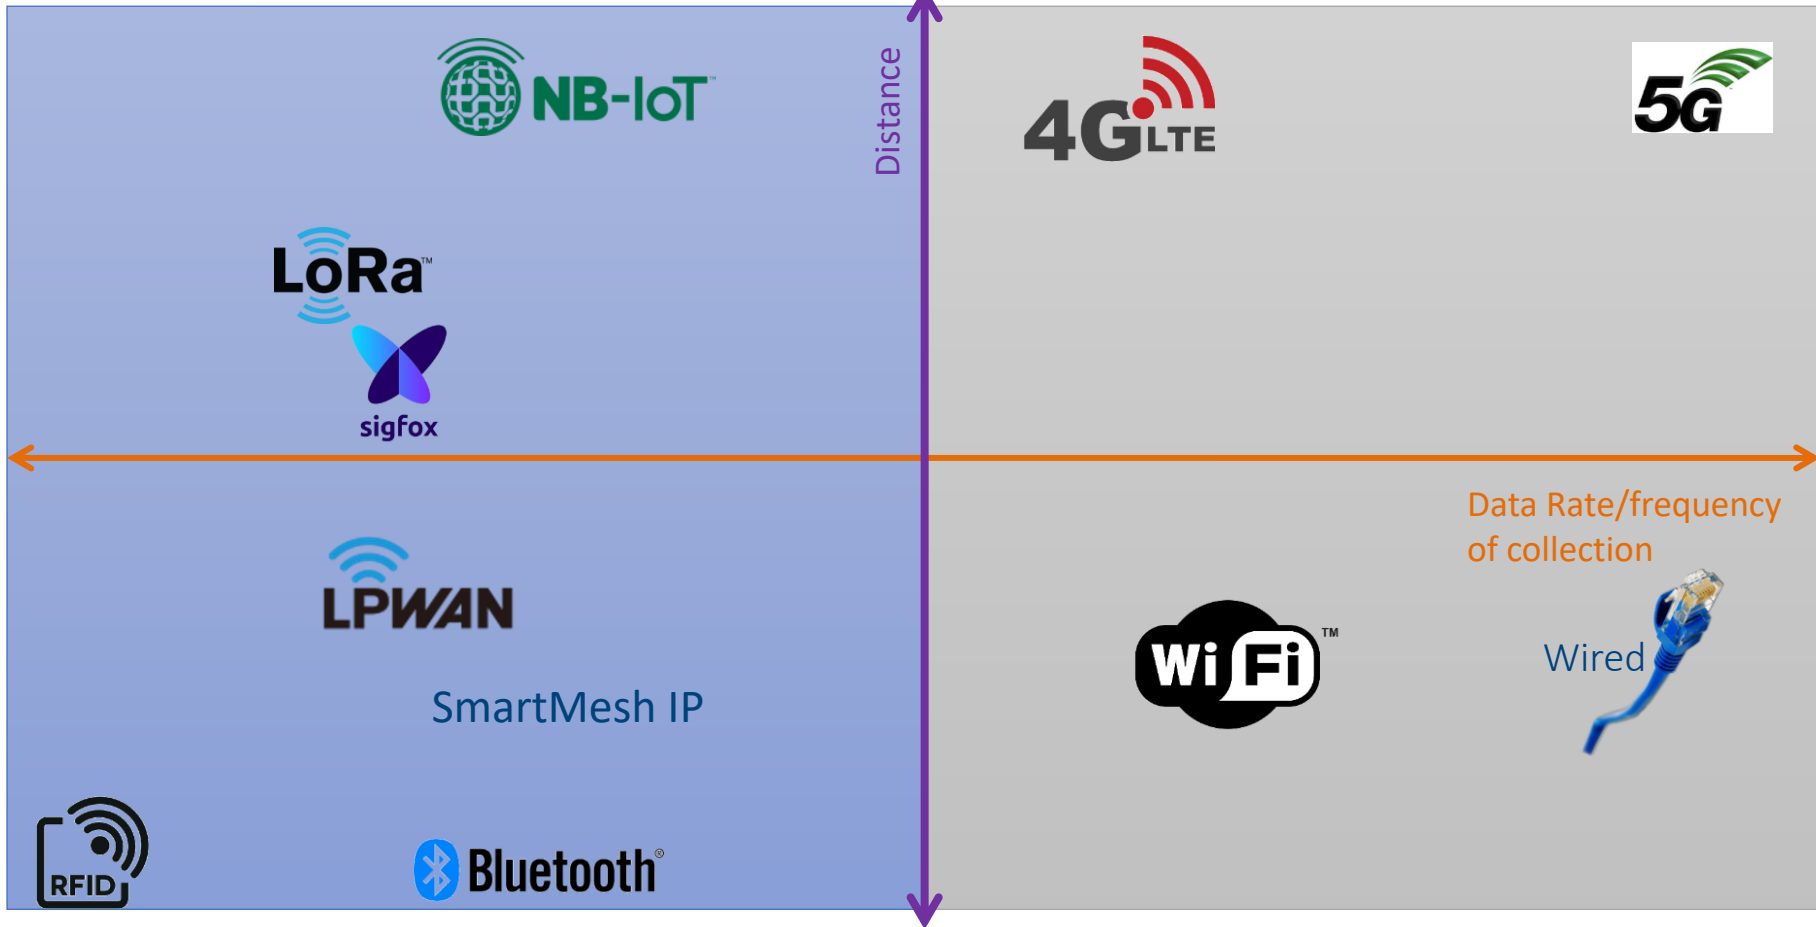

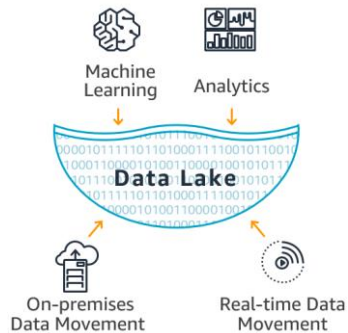

No need of human set up
Today 90% is coming from cameras
Tomorrow all the raw data will contribute

Industrial 5G. The Wireless Network of the Future.

La soluzione tecnologica –Wireless–

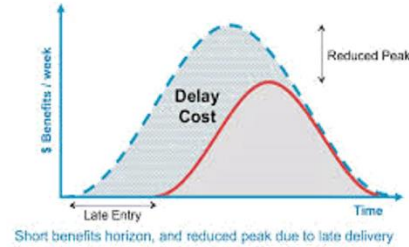

Cloud is not replacing the edge but is adding additional unique features

Edge is becoming more powerful and will keep on being more capable of new features

There are 2 kind of cloud solutions :

- **Hyperscaler**
 - All in one solution able to interact with any aspect of an organization
 - + total integration
 - not fitting perfectly for all the aspects
- **Vertical market driven**
 - Dedicated solution able to fulfill all the specific needs
 - + Fast Time To Market
 - - Limited to a specific part of the company scope

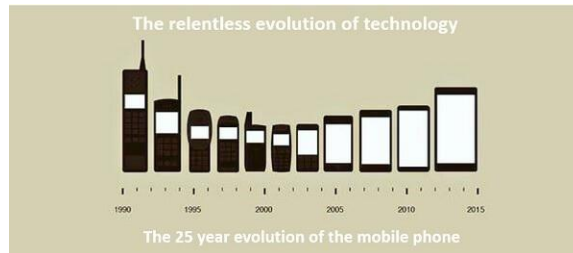

Impact of delayed release on benefits

- **Time To Market**

- The faster you are, the better you can solve end customer pain points

- **Stay on the edge**

- Factory automation is not a revolution but it's a continuous evolution

Jump in with everyone else.
Or jump right.
