

**Progettazione meccanica:
dalla scelta dei componenti di base alla
realizzazione del sistema cartesiano completo**

Andrea Piatti

Bosch Rexroth S.p.A.

Sistemi Cartesiani e Sistemi Lineari

Come è fatto un Sistema Lineare Meccatronico

Sistemi Lineari

Sistema di guida

Sistema di azionamento

Struttura ed accessori

Motori ed azionamenti

Sistema Lineare

Sistemi Lineari: le principali differenze

Azionamento a vite

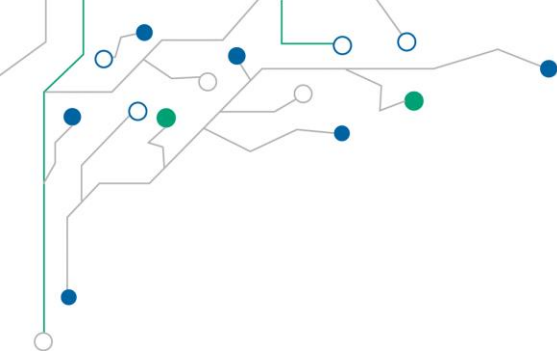

Azionamento a cinghia

Monorotaia

Birotaia

Come si realizza un Sistema Cartesiano Meccatronico

Realizzazione di un sistema cartesiano

Conoscenze necessarie

- Applicazioni
- Gamma prodotti
- Tecnica di base

Analisi
dell'applicazione

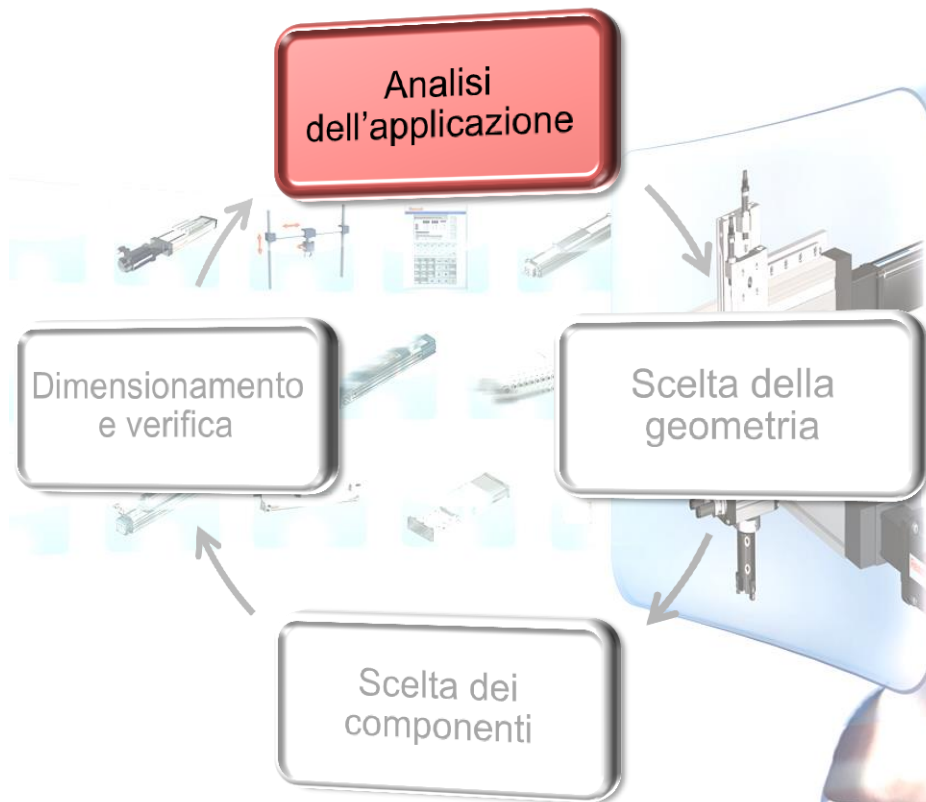

Scelta della
geometria

Dimensionamento
e verifica

Scelta dei
componenti

Realizzazione di un sistema cartesiano

Industria farmaceutica ed assemblaggio

Movimentazione cassette di frutta

- Azionamento a cinghia e pneumatico
- Birotaia
- Motori brushless

Avvitatura e movimentazione testate

- Azionamento a vite e cinghia
- Monorotaia e birotaia
- Motori brushless

Incartonatrice panetti di burro

- Azionamento a cinghia
- Monorotaia
- Motori brushless

Centro di lavoro per pastiglie freno

- Azionamento a vite
- Birottaia
- Struttura massiccia e precisa

Macchina riempitrice tubi di silicone

- Azionamento con motore lineare
- Monorotaia

Posizionatore antenne in galleria del vento

- Azionamento a vite
- Monorotaia
- Motori brushless

Magazzino vestiario per ospedale

- Azionamento a cinghia
- Monorotaia

Realizzazione di un sistema cartesiano

Cartesiano a 3 assi
