

## Soluzioni integrate test e CAE *Unit-dose packaging machine*

Fabio Marzo - Sales Executive

Unrestricted

# Performance Engineering Integrated Simulation and Testing process

Concept Design and Machine Simulation Frontloading Simulation

Prototyping and Testing

Virtual Commissioning Startup and Physical Commissioning

Closed-Loop Validation

Conventional pack, including small cups, small bottles and tubes, with content from 1 to 30 ml.

Advantages in term of **flexibility** and **production cost for units** 

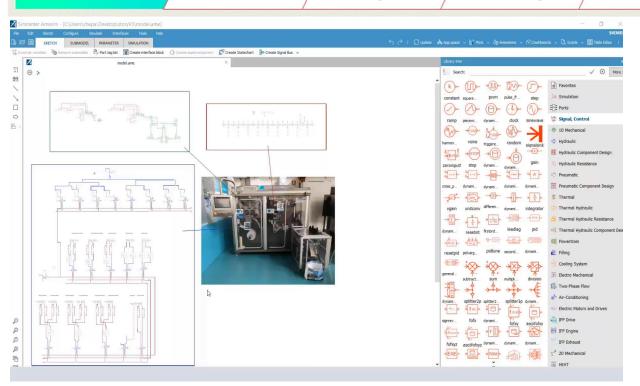

### Concept Design and Machine Simulation

Concept Design and Machine Simulation Frontloading Simulation

Prototyping and Testing Virtual Commissioning Startup and Physical Commissioning

Closed-Loop Validation

#### How do you...

Transform requirements of increasing machine throughput into engineering objectives with limited modifications?

Mature from initial architecture definition to detailed systems design and components sizing?

Benchmark your planned machine versus your competition?

### Frontloading Simulation

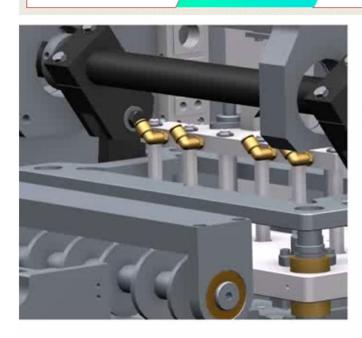

Concept Design and Machine Simulation

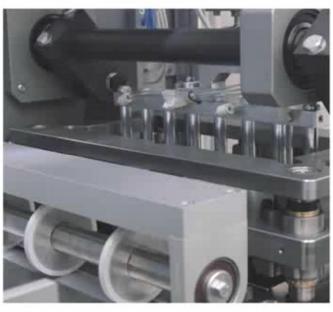

Frontloading Simulation

Prototyping and Testing

Virtual Commissioning Startup and Physical Commissioning

Closed-Loop Validation

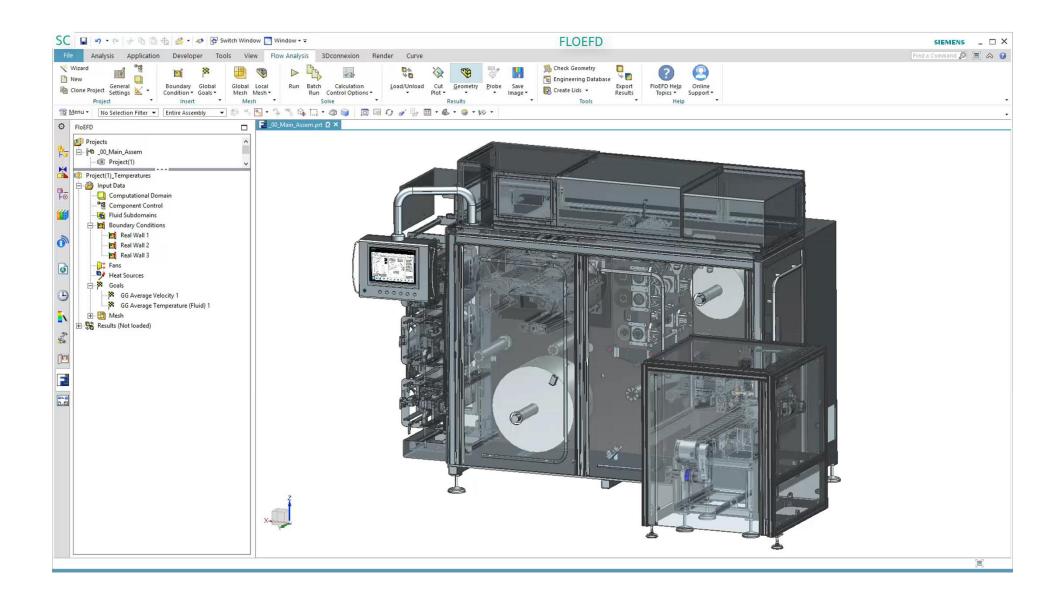

How do you...

**Identify design issues** as early as possible?

**Explore** new design alternatives?

**Balance** multiple performance parameters?

Simulation **validated** by physical testing

### **Prototyping and Testing**

Concept Design and Machine Simulation Frontloading Simulation

Prototyping and Testing

Virtual Commissioning Startup and Physical Commissioning

Closed-Loop Validation

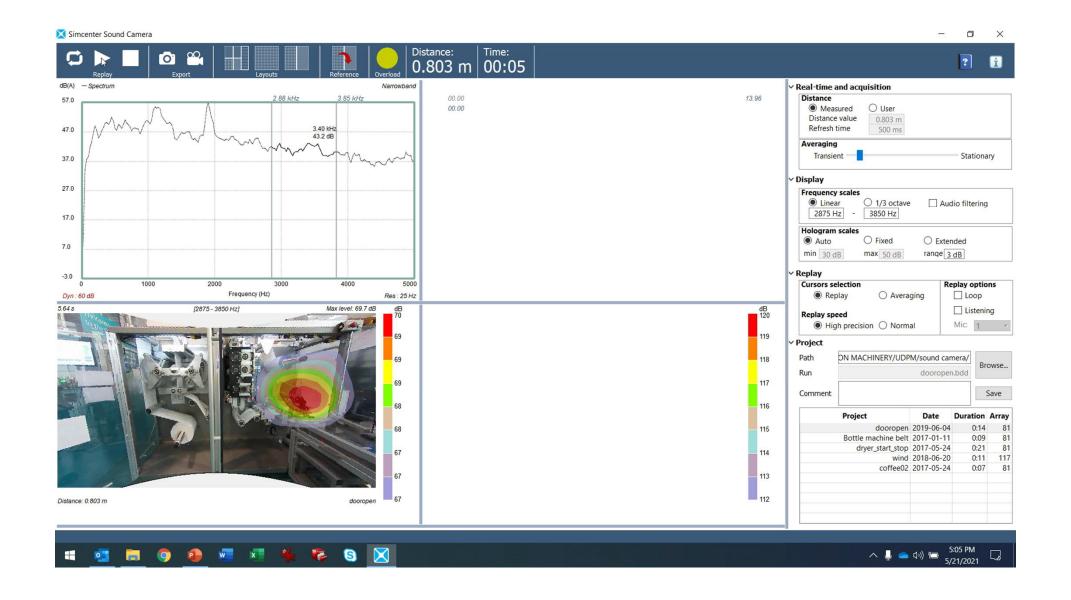

#### How do you...

Validate Key Performance Indicators of the physical machine spanning multiple domains?

Locate the root cause of the problem with machine prototypes, faster?

Improve the accuracy of simulation models to better represent the real machine?

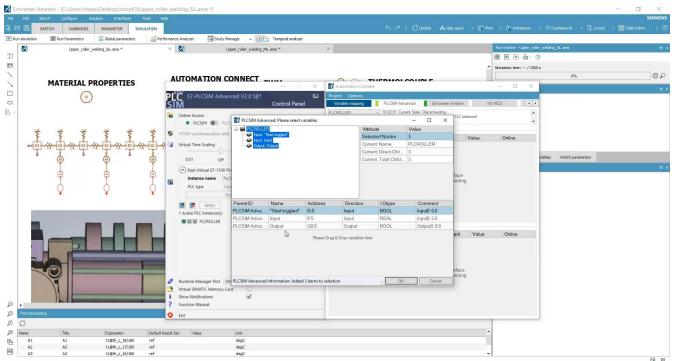

Concept Design and Machine Simulation

Frontloading Simulation

Prototyping and Testing Virtual Commissioning Startup and Physical Commissioning

Closed-Loop Validation

How do you...

**Limit onsite errors** associated with physical commissioning?

Shorten commissioning time and put the operational machine in line as soon as possible?

**Train** your customer's workforce adequately?

### Startup and Physical Commissioning

Concept Design and Machine Simulation

Frontloading Simulation

Prototyping and Testing Virtual Commissioning Startup and Physical Commissioning

Closed-Loop Validation

How do you...

**Keep the machine commissioning process** as short as possible?

**Limit end-user complaints** and on-site interventions?

### **Closed-Loop Validation**

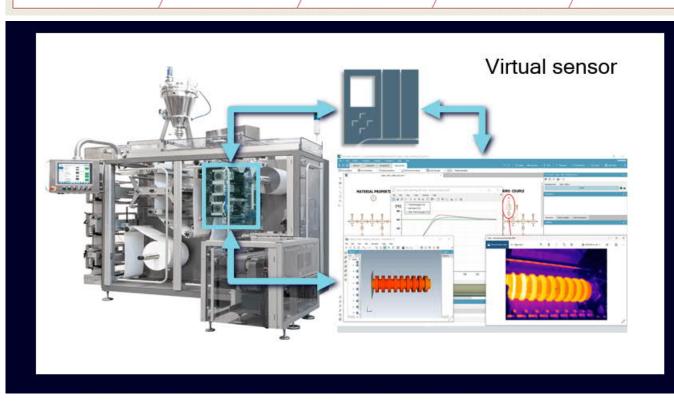

Concept Design and Machine Simulation

Frontloading Simulation

Prototyping and Testing

Virtual Commissioning Startup and Physical Commissioning

Closed-Loop Validation

How do you...

Minimize customers' lost revenue due to unforeseen machine downtime?

**Predict** reliable maintenance tasks?

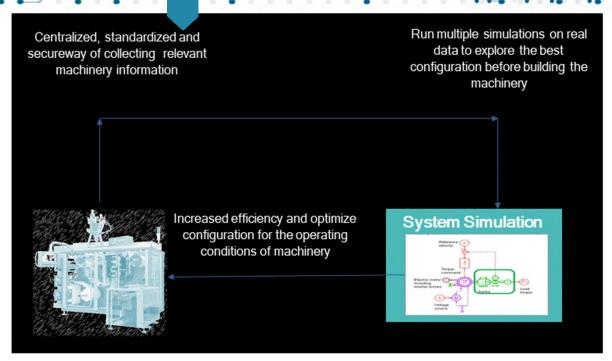

Capture machine performance from the field for next generation designs?

**Optimize** machine performance based on operating environment?

### Manage Simulation

Concept Design and Machine Simulation Frontloading Simulation

Prototyping and Testing

Virtual Commissioning Startup and Physical Commissioning

Closed-Loop Validation

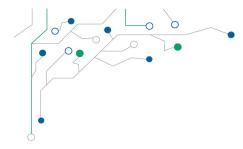

#### How do you...

Quickly find and analyze the latest machine simulation and design data throughout the development cycle for all project stakeholders?

**Capture and manage** expert knowledge for re-use?

**Reduce reporting** and data preparation time needed for certification?
